

Air2-DT200T

## Air2-DT200T

The Air2-DT200T is a wireless curtain PIR detector that thanks to the combination of two sensors and digital signal analysis provides precision sensing and tracking of motion in the protected area. The use of dual technology provides the highest sensitivity available whilst virtually eliminating false alarms. The temperature compensation feature allows the detector to adapt to almost all types of ambient conditions. The shock and tilt sensor protects the device against attempts to remove or open the detector enclosure, whilst the anti-masking function detects any kind of interference. The Air2-DT200T is particularly suitable for the protection of doors and windows and is advised for professional outdoor applications.
