

Air2-KF100

Air2-KF100

By means of a two-way transmission channel with the monitoring software, the KF100 remote control is capable of producing a visual feedback signal on its LED indicator. It has 4 control buttons which can be programmed through the control panel. This remote-control device also allows the user to arm/disarm the intrusion control system and open/close a gate or turn On/Off lights, it also provides an audible feedback signal indicating the successful outcome of requested operation. The KF100 provides a "lock keyfob" option which protects the keyfob against accidental operations.
