### Graphical User Interface

Enjoy our user-friendly graphical interface for easy and simple system operation

### Mobile Monitoring

Anywhere – anytime accessibility! Mobile monitoring allows you to "watch" your home or business directly from your mobile phone, from anywhere and at any time! Our DVRs support mobile monitoring via iPhone, Blackberry devices as well as Android, Windows Mobile and Symbian based mobile phones.

### Web-Viewer

Our powerful Web-Viewer supports both "SAFARI" and "INTERNET EXPLORER" browsers. Web-Viewer provides users with Live Monitoring, Playback and Ever system configuration remotely from any PC, without the need for specially installed software installation.

### Smart Playback Search

Our Smart playback search system allows playback search according to different parameters for your convenience. You can search video data according to time, files list

### Dual Stream

Dual stream video processing is designed to optimize the system performance of the DVR, allowing it to simultaneously record high resolution video and stream low resolution video via network for web viewing.

### H.264 Compression

H.264 is the latest and most advanced Video Compression Technology. It is twice more efficient than MPEG4, providing superior video quality at low bit rates. An additional benefit of using H.264 is remote viewing of "smooth" video streaming even with low bandwidth utilization.

### Phone application.

Enjoy our amazing FREE iPhone Application "SuperLivePro." SuperLivePro offers you -

- Live View for- single/multi-channel display mode
- Audio Support (2 Way- listen and talk)
- Local video recording and playback on your mobile device
- Image snapshot
- Remote playback including smart search
- Remote system configuration
- Servers list
- PTZ control
- Color adjustment

### Email notification.

Our DVR system can be configured to send real-time email notifications, in case motion was detected in one of your cameras, keeping you updated and "on-line" at all times.

### HDMI(optional for D1 model only)

Our D1 DVR series including a HDMI video output so you can display your cameras in superior quality on full HD (1080P) monitor.
